PROJECTS

AFRICAN MARKETPLACE

WEBSITE • GITHUB

Sept 2021 | Front-End

African Marketplace is a merchant marketplace. This project was completed in under 4 days using React, MaterialUI, Redux, Express, JWT, and PostgreSQL by 2 React developers and a Node/Express developer.

- Created and implements UI design with MaterialUI
- Integrated CRUD operations with Redux
- Pair-programmed to developed global state management via Redux

FAMILY BUDGET

WEBSITE • GITHUB

Winter 2021 | Front-End & Back-End

Many budgeting apps only allow one user to manage a budget which can lead to inaccurate cash expenditure tracking, but the Family budget app allows couples/families to jointly manage a budget. This app was built using React, MaterialUI, ContextAPI, Express, JWT, and PostgreSQL

- Created end-to-end tests for API requests
- Designed and tested custom validation middleware for handling API requests
- Integrated external database to Node server
- Designed and interfaced all UI elements with API
- Used Context API to handle CRUD operations
